

Racohitrans

The Racohitrans suction unit is a pneumatic tool specifically designed to convert the supplied compressed air into a powerful vacuum suction and transfer system for solid or liquid materials.

INDUSTRIAL EQUIPMENTS

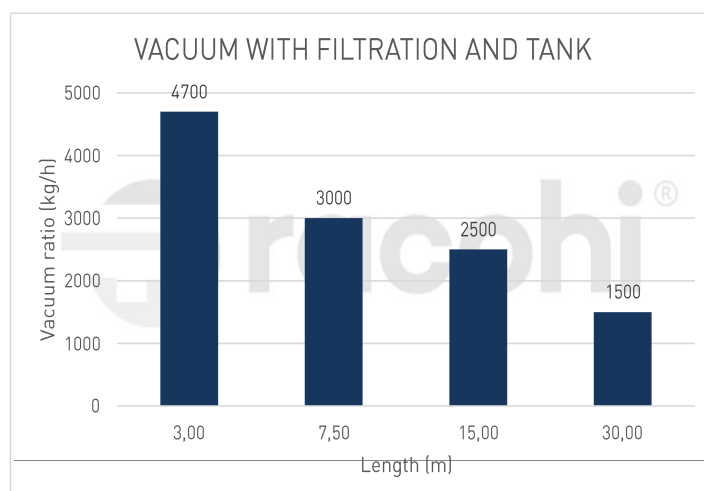

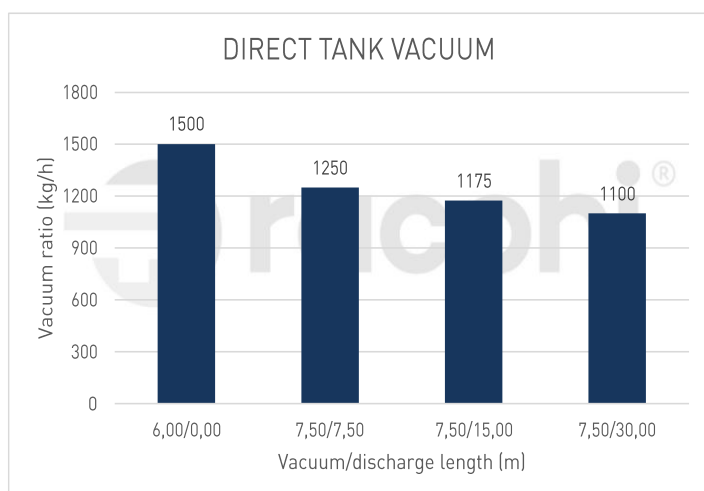

RACOHITRANS PNEUMATIC VACUUM RECOVERY

The Racohitrans equipment is a tool used for the recovery of abrasives by vacuum after blasting operations.

FEATURES:

- Easy to handle.
- Powerful discharge and suction speed.
- Maximum size of recovered residue: ½" diameter.
- Vacuums any dry, liquid or mixed material that can float.
- Tubes of different sizes to reach any corner without any problem. Recommended for insertion in tanks, reservoirs, etc.
- Maximum air consumption at 7 bar: 3-4 m³/min depending on the material to be vacuumed.
- For light materials, air consumption approx.: 1.5 m³/min.

By way of example, the following the suction ratio data shows that depending on the distance and configuration, suctioning corundum.

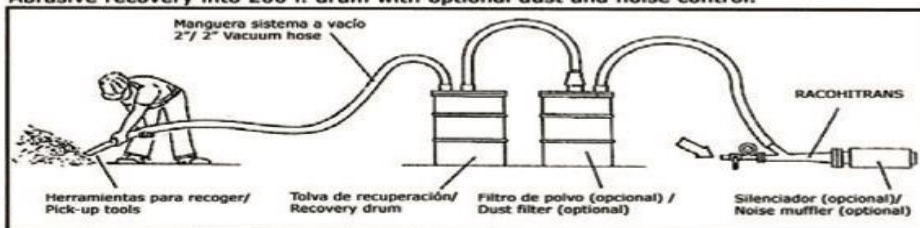

RACOHITRANS SISTEMA DE RECUPERACIÓN A VACÍO RACOHITRANS VACUUM RECOVERY SYSTEM

CONFIGURACIÓN 1/ CONFIGURATION 1:

Abrasivo recogido en la tolva de 200 l. con opciones de filtro de polvo y silenciador.
Abrasive recovery into 200 l. drum with optional dust and noise control.

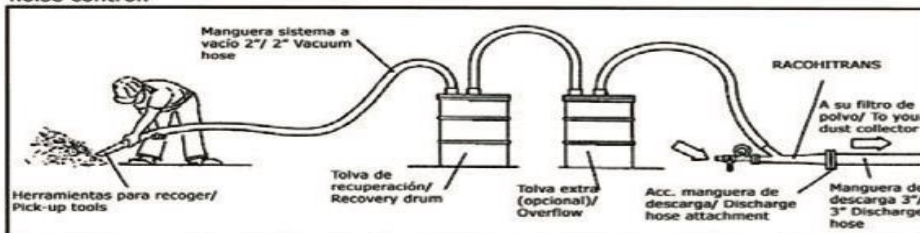

CONFIGURACIÓN 2/ CONFIGURATION 2:

Abrasivo recogido en la tolva montada sobre un contenedor o un transportador con opciones de filtro de polvo y silenciador.
Abrasive recovery into dump hopper mounted above larger container or conveyor with optional dust and noise control.

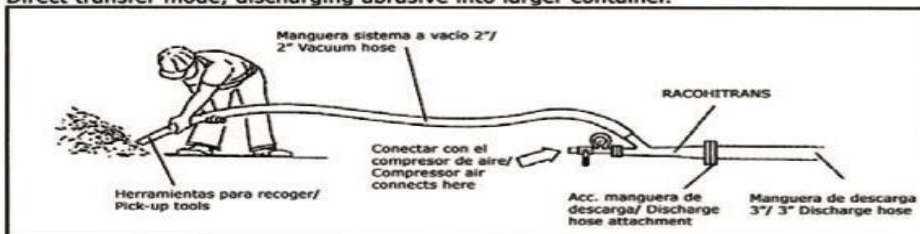

CONFIGURACIÓN 3/ CONFIGURATION 3:

Abrasivo recogido en la tolva de 200 l. utilizando su propio sistema de filtro de polvo y silenciador.
Abrasive recovery into 200 l. drum or drum hopper using your dust collection system for dust and noise control.

CONFIGURACIÓN 4/ CONFIGURATION 4:

Modo de transferencia directa, descargando abrasivo al contenedor grande.
Direct transfer mode, discharging abrasive into larger container.
